Dispensing Association

PHYSICIAN DISPENSING ASSOCIATION ACCREDITED

ABOUT PHYSICIAN DISPENSING

75% of patients would prefer to obtain their prescriptions at their point of care. Point-of-care dispensing also positively affects compliance.

We are committed to caring for your prescription needs.

OUR ACCREDITATION

We are proud of our achievement of being accredited by the Physician Dispensing Association (PDA) for point-of-care compounding. The accreditation is awarded in recognition of our commitment to meeting and/or exceeding national quality standards.

Achieving accreditation is a process where we demonstrated compliance with national standards. This reflects an organization's dedication and commitment to meeting and exceeding standards which facilitate a higher level of performance for patient care.

OUR MEDICATIONS

We've contracted with a U.S. based FDA facility to design custom prescription medications. All medications are produced using FDA approved National Drug Code ingredients. We prepare these custom prescriptions specifically for your skin condition and we have the ability to remove ingredients that are known to be allergens or irritants. With this service our patients are reporting better outcomes and satisfaction.
